Monte Carlo Methods, Computer Simulation and its future Avenues and recent Researches

Parul Gupta

Software Development Engineer II at Expedia Group | Ex-Amazonian | USC CS Alumni'21 | GHC'22 in-person attendee & GHC21, GHC20 Scholar | Software Engineer | Data Engineer | Data Analyst | Data Science

Greater Seattle Area

Summary

A highly motivated Computer Science graduate with extensive experience as a Full-Stack Software Engineer, currently employed as a Software Development Engineer at Expedia in Seattle.

Throughout my years as a computer science practitioner, I've come to appreciate the transformative power of technology and its profound impact on the world. My passion lies in developing solutions that address real-life problems, reflecting a consistent commitment to this principle in my work.

Technical Proficiencies:

Programming Languages: Proficient in Python; Intermediate in C, C++, Java, SQL; Beginner in C#.NET, R.

Web Technologies: Proficient in HTML, CSS, JavaScript, React, Next JS.

Databases: Proficient in MySQL, Oracle SQL, Firebase, Postgress.

Frameworks and Libraries: Experienced in MVC, Apache Spark, MapReduce, and proficient in pandas, numpy, pyspark, matplotlib, sci-kit learn.

Other Technologies: Familiar with Kafka, RCP, Kubernetes, Qubole, Airflow, splunk.

Tools: Proficient in Anaconda, Eclipse, Git, WordPress, ServiceNow, Visual Studio, Tableau, JIRA, IntelliJ.

Machine Learning Algorithms: Experienced in Decision Trees, K-Nearest-Neighbors, Linear Regression, Logistic Regression, Perceptron, K-Means Clustering.

Beyond my technical expertise, I am an active participant in both tech and non-tech events, enjoying socializing and contributing through volunteer work.

Experience

Expedia Group

Software Development Engineer II

October 2022 - Present (3 years 8 months)

Seattle, Washington, United States

Amazon

Software Development Engineer

July 2021 - October 2022 (1 year 4 months)

Redmond, Washington, United States

USC Viterbi School of Engineering

VASE Intern

June 2020 - May 2021 (1 year)

Los Angeles, California, United States

- Automating matching process of mentees with potential mentors via python scripts.
- Providing trends for improvement of student engagement activities by doing regular data analysis
- Presented department wise stats of students got admitted to Viterbi School using Pandas and NumPy python libraries.
- Designing and maintaining Viterbi's graduate student websites using WordPress, HTML and CSS.

University of Southern California

Graduate Student

August 2019 - May 2021 (1 year 10 months)

Greater Los Angeles Area, California

- Currently pursuing Master's in Computer Science (Data Science).
- In first semester, I have taken two subjects: Algorithm design and analysis & Foundation of Artificial Intelligence.
- In second semester, I have taken two subjects: Data-mining and Database Systems.

Robotics and Coding Academy, Division of Engineering Education, USC

Student Mentor

October 2019 - January 2021 (1 year 4 months)

Greater Los Angeles Area

- Taught 4th and 5th-grade school students the basics of Robotics and C coding.
- Conducted interactive sessions involving robot building and learning how to program it, review core concepts and provide continuous hands-on experience using the Wallaby robot.
- Impart technical knowledge, team skills, logical thinking, problem-solving skills and tested their learning in a week-long hackathon.
- Students are exposed to experiential learning and by the end are well-versed in robot building, functioning, navigating, programming, and problem-solving.

Accenture in India

Software Engineer

October 2016 - July 2019 (2 years 10 months)

Gurgaon, India

January, 2019 - July, 2019 :

- Wrote python scripts for AI based expert system to automate infrastructure monitoring, reduced 70% of manual monitoring.
- Coordinated with 40 team members to develop application that recommends Machine Learning Models based as per data from user.
- Created and presented Data Science presentations using Microsoft PowerPoint to four new team members during three-week training.
- Identified and analyzed top recurring incidents logged in ServiceNow using Pandas and NumPy.
- Performed applications testing using Cross validation and Regressive split and Train approach via python scripts

October, 2016 - December, 2018:

- Worked on prototyping AI/Expert system for comprehensive automation of infrastructure monitoring.
- Provided training to team on Python and its use in Data analysis.
- Monitor the whole infrastructure 24*7 and alerts: Tidal, Network, SCOM, ISX for UPS devices.
- Worked on HP tools (OMI, NNMI) and others (Solarwinds, datacenter expert, Vsphere) to manage data centers, network components, servers for performance, utilization and Disk space.
- Done unit testing of client's critical applications and portals.
- Proactively identified and analysed top recurring incidents and present it to client to eliminate the problematic elements.
- Validated post and pre-system patching activities.

- Handled major escalations and worked closely with L3&L4 team to get the issue fixed within SLAs.

Humming Bird Edu. Ltd.

Software Developer

January 2016 - May 2016 (5 months)

New Delhi Area, India

- Built OnMouseClicked (<http://www.onmouseclick.com>), Web Based ERP Software System providing a Complete Management Solution for K-12 schools on .Net MVC framework.
- Worked on modules: Email and SMS center, Student Registration, Attendance management.
- Designed database using SQL with different constraints to store comprehensive information of school students and staff.

Defence Research and Development Organisation

Software Developer and Researcher Intern

June 2015 - August 2015 (3 months)

New Delhi Area, India

- Developed software application “GUI for GPS” for integration with laser based defense system in C# and MVC framework for security enhancement.
- Automated validation of data coming from GPS using this desktop based software application.

CETPA Infotech Pvt. Ltd.

Summer Trainee

June 2013 - August 2014 (1 year 3 months)

New Delhi Area, India

Learnt how to build comprehensive database management system using SQL and Oracle technologies.

Worked on MVC .Net framework and C# programming language.

Education

University of Southern California

Master's degree, Computer Science · (2019 - 2021)

Udacity

Udacity Bertelsmann Data Science Scholarship 2018, -Statistics - SQL - Python - Data Visualization · (2018 - 2018)

Northern Indian Engineering College (newly known as Dr. Akhilesh
Das Gupta Institute of Technology & Management)
Engineer's Degree, Computer Science · (2012 - 2016)
